

Slash Commands for Non-Technical Users

Additional resources

COURSE	AI Workshop 2.0, Desktop Edition
AUTHOR	Danny McMillan, Seller Sessions
YOU NEED	A Mac or PC and a paid Claude plan

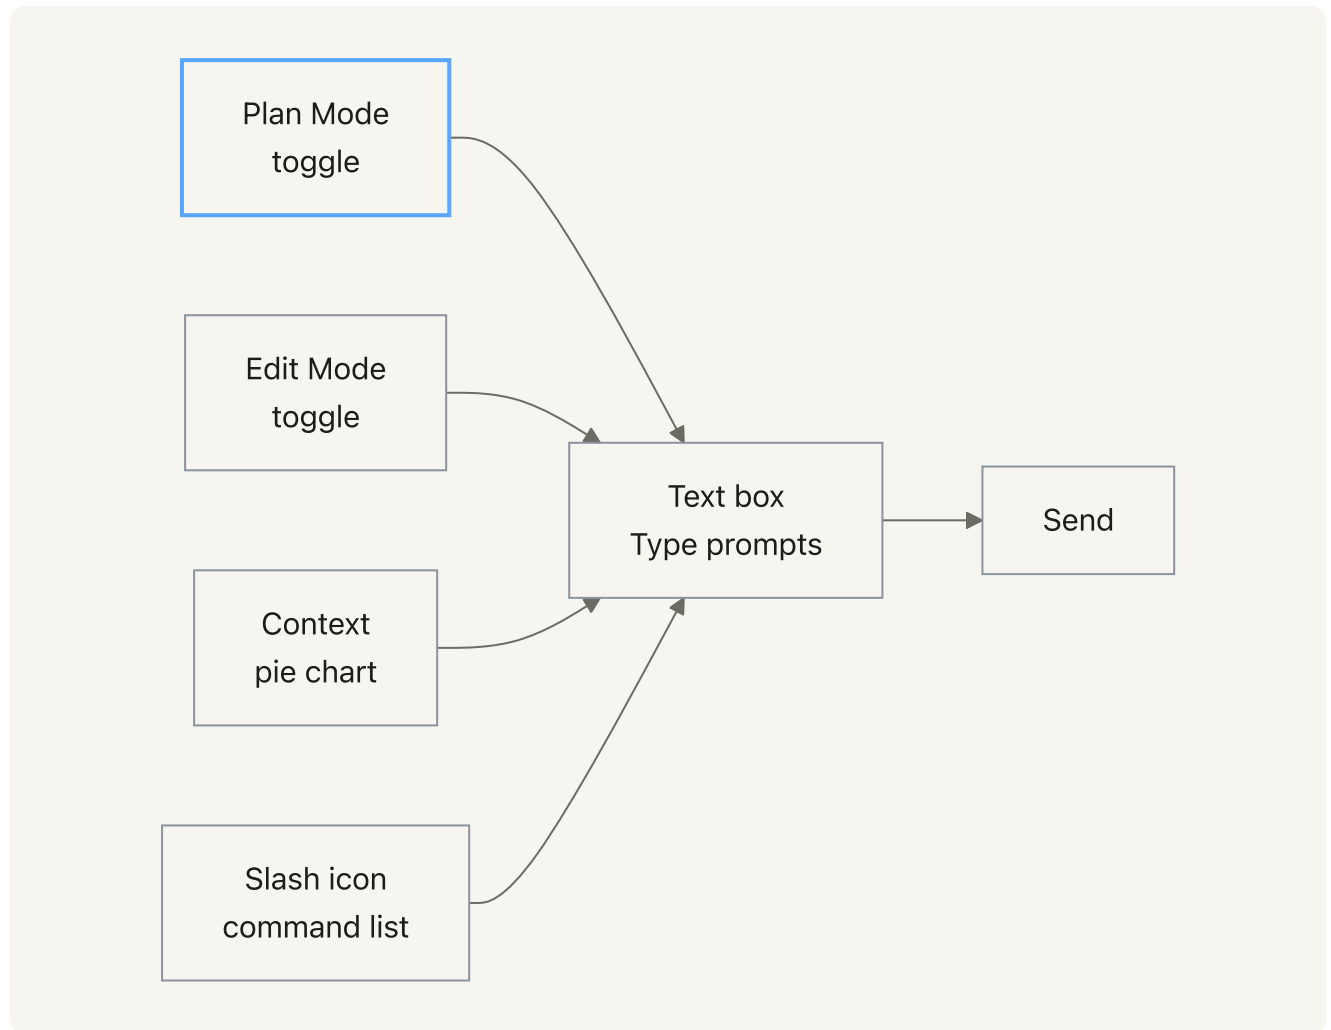

Additional resources

Quick reference for the built-in commands and chat UI controls you'll use most.

Essential Slash Commands

COMMAND	WHAT IT DOES	WHEN TO USE IT
<code>/compact</code>	Shrinks long conversation history while keeping key points	When your chat is getting long and Claude starts forgetting earlier context
<code>/cost</code>	Shows your current usage/spend for this session	When you want to check how much you've used
<code>/review</code>	Runs a focused review on your current draft or content	After writing something -- get specific issues and improvements, not just "looks good"
<code>/todos</code>	Turns the current discussion into a simple to-do list	When a chat becomes a plan and you want clear, trackable tasks

Chat Box UI

What the UI Controls Do

CONTROL	WHAT IT DOES	PLAIN ENGLISH
Plan Mode toggle	"Think first, then act" mode	Claude proposes a plan before making changes. You approve before it starts
Edit Mode toggle	Ask before editing / Auto	Controls whether Claude needs your permission before changing files
Context pie chart	Shows how full Claude's memory is	When the pie is nearly full, use <code>/compact</code> or start a new chat
Slash icon	Opens the command list	Click to browse all available commands instead of typing from memory
